Summary

Computer Engineering undergraduate at **Veermata Jijabai Technological Institute (VJTI)**, Mumbai, with hands-on experience in **Full-Stack Web Development, Frontend Engineering, Database Design, Desktop Application Development, and Computer Vision**. Proficient in **JavaScript, React.js, Node.js, Express.js, MongoDB, C++, Python, SQL, Qt6, OpenCV, and Git**. Strong foundation in **Data Structures & Algorithms, Object-Oriented Programming, and Responsive UI/UX Design**. Passionate about building scalable, user-centric software solutions with clean, maintainable code.

Education

Veermata Jijabai Technological Institute (VJTI), Mumbai Sep 2025 – Present
Bachelor of Technology (B.Tech) in Computer Engineering

- Department Coordinator, **Enthusia (Sports Committee)**.
- Active Member, **DLA Literature Committee**.
- Building full-stack and frontend applications while strengthening Computer Science fundamentals.
- Solved **100+** Data Structures and Algorithms problems on LeetCode.

Maharashtra State Board (HSC) 2025
Higher Secondary Certificate 84.50%

Suyash Vidyalaya
Secondary School Certificate 97.00%

Technical Skills

Languages: C++, JavaScript, Python, SQL
Frontend: HTML5, CSS3, React.js, Responsive Web Design
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Desktop Development: Qt6, Qt Widgets, ODBC
Computer Vision: OpenCV, MediaPipe
Developer Tools: Git, GitHub, Vercel, GitHub Pages
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Design, Problem Solving

Projects

BookReview App | *HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB*

- Developed a full-stack book review application with Node.js, Express.js, and MongoDB supporting end-to-end review and rating management.
- Designed a normalized MongoDB database structure to efficiently manage books, user reviews, and ratings.
- Built backend REST APIs connecting the frontend with the database for seamless CRUD operations and review workflows.
- Designed responsive book listing and detail pages with intuitive navigation and clean UI/UX principles.
- **Live:** book-review-six-chi.vercel.app

Library Management System | *C++, Qt6, MySQL, ODBC*

- Developed a desktop library management system using Qt Widgets with live MySQL database integration through ODBC.
- Designed a normalized five-table relational database with foreign keys and CHECK constraints to ensure data integrity.
- Implemented seven SQL-powered reports using JOINS, GROUP BY, and aggregate functions for library analytics.
- Used database transactions to safely process borrow operations, preventing concurrent stock inconsistencies and double-booking.
- **GitHub:** github.com/Pradnyadange/LibraryManagementSystem

AI Virtual Mouse | *Python, OpenCV, MediaPipe*

- Built a computer vision application enabling real-time mouse movement and click actions using hand gesture recognition.
- Implemented MediaPipe hand landmark detection and OpenCV-based video processing for accurate gesture tracking.
- Mapped detected hand coordinates to screen coordinates for smooth cursor movement and interaction.
- Explored computer vision concepts, real-time image processing, and human-computer interaction beyond web development.
- **GitHub:** github.com/Pradnyadange/Virtual-Mouse

Note Organizer | *React.js, JavaScript, HTML5, CSS3*

- Developed a React-based note management application with persistent browser storage for seamless offline access.
- Implemented folders, tags, priorities, due dates, advanced search/filtering, and rich-text editing to improve note organization.
- Added dark mode, optional encryption, and multi-format export while maintaining a responsive, component-based architecture.
- Designed reusable React components to deliver a clean user experience across desktop and mobile devices.
- **GitHub:** github.com/Pradnyadange/Noteorganizer

BookMyTrip | *HTML5, CSS3, JavaScript*

- Designed and developed a responsive travel booking interface inspired by modern travel reservation platforms.
- Built destination listings, search/filter functionality, and an intuitive multi-step booking workflow.
- Implemented responsive layouts optimized for desktop, tablet, and mobile devices.
- Applied UI/UX best practices to improve navigation, accessibility, and overall booking experience.
- **GitHub:** github.com/Pradnyadange/Bookmytrip

Leadership & Activities

- Department Coordinator, **Enthusia (Sports Committee)**, Veermata Jijabai Technological Institute (VJTI), contributing to the planning and execution of institute-level events.
- Active Member, **DLA Literature Committee**, participating in student engagement and literary initiatives.
- Freelance Frontend Developer delivering responsive websites, landing pages, dashboards, portfolio websites, and business websites for individuals and small businesses.

Achievements

- Secured **99.70 Percentile** in the Maharashtra Common Entrance Test (MHT-CET).
- Solved **100+** Data Structures and Algorithms problems on LeetCode, strengthening algorithmic thinking and problem-solving skills.
- Achieved **97.00%** in SSC and **84.50%** in HSC (Maharashtra State Board).
- Continuously building full-stack, frontend, desktop, and computer vision projects while pursuing a Bachelor's degree in Computer Engineering.
